Dear Laxmikant Shinds Sir,

Thank you for inviting SLEC to do seminar on Study International Education Carterr in your College of Engineering, Manjari (Bk)

We are asger to know the state for the seminar when there will be meximum analysisting of angineering students mostly of that year of engineering of all aheams.

Kandly send me your confirmation over email or phone. I box forward to hearing from you and if you require any more information fram us please do not hearing to confact us.

Thank You for your kind consideration.

We are happy to quanch the thirst of international education

Thanks & Regards,

Sagar Sonawane/ Marketing Manager mkg.pune@sienda.com / Mobile: +91-9871284747

Notice for Seminar

Date: - 16/03/2018

All students of B.E. are hereby informed that seminar on Resume preparation, GD, registration on Job portals PI and Job Portal schedule on 22nd & 23rd March 2013 at IT Seminar Hall Find the below details.

Conduct By: Mr. Laxmikan J. Shinde

Start From: 22nd & 23rd March 2018

Duration: 2 days

Time: 11.00 a.m. to 1.30 p.m.

Topics covered:

1. Preparation of Resume

2. Interview Question preparation

- 3. Questions for PI, HR and Technical Round
- 4. Group Discussion Do and Don't
- Aptitude Test Preparation
- 6. Registration on Job Portals
- 7. Registration on Government Job Sites

This Seminar series help students to face interviews more prepared and confident.

Respected Sir,

We are very much thankful to you for accepting our invitation for delivering lecture in one day workshop for our students and guide them about different technological about Microprocessor. This workshop helps in understanding fundamental issue & challenges in Microprocessor. Students will able to design & implement various algorithms in microprocessor.

We hope that you will find the experience personally rewarding for agreeing to attend in this wonderful opportunity to recognize talented, hardworking young people.

Your presence is worth for us.

Thanking You,

Record

Notice for Seminar

Date: - 18/04/2018

All students of B.E. (Computer and IT) are hereby informed that Free seminar series in <u>JAVA interview preparation</u> under ISTE Student chapter start from 24th April 2018. Find the below details.

Conduct By: Mr. Pradip Batule (IT Professional)

Start From: 24th April 2018.

Duration: 7 days

Time: 9 AM-11 AM

Topics covered:

- 1. OOPS concepts
- 2. Access specifiers
- 3. Method overriding, Method Overloading
- 4. FINAL, STATIC, VOLATILE, TRASIENT keywords
- Exception handling
- 6. Serialization
- 7. Immutable class
- 8. String
- 9. Wrapper classes
- Collection framework -
- 11. Equals and hash code contract
- Multi-threading basics

This Seminar series help students to face interviews more prepared and confident.

Guest Lecture Report

The Department of Computer Engineering of PDEA College of Engineering Manjari organized a guest lecture on "Career Guidance by Employee Factory" on 1st of March 2018 from 10:15 am to 12: 30 pm at IT Seminar Hall. The speaker of the session was Mr. Ashish Sharma who is founder of The Employee Factory firm and having a great experience on cooperate world. He explained us about the various job opportunities in IT industry. He explained to the students about what are the basic skills they required in CV for grabbing opportunities in IT Company. Also the resource person focuses on latest IT industry trends including block chain. He introduces what is block chain technologies and its importance. Also he highlights the job opportunities in block chain technologies.

During the talk Mr Ashish Sharma asks many questions to the students regarding awareness and making interest among them. Ashish Sharma was a very interactive person with his communication skills. The students got free and healthy atmosphere during the session. Some of the students are very keen to asking lots of questions on job opportunities. The spoke person gives all the answers to each student.

His main aim was to let us know what kind of job opportunities came across during students job searching and how to decide and tackle the same.

Around 50 students attended this lectures from both second year computer and IT department. He also took an initiative to arrange many more session from his side to the students on the same.

Topic Name: Career Guidance by Employee Factory

Speaker Name: Mr. Ashish Sharma (Founder, The Employee Factory)

Date: 01/03/2018

Venue: IT Seminar Hall

Organized By: Prof. Rathod R. B.

Criteria 3 3.2.1 -Ciai

The event is oraganized for students in order to get knowledge of job opportunities in IT industries with different profile. The expert was having long experinece in IT domain and running the Empoyee factory firm for job seekers. The students got benefitted with his talk and also speaker got convience by srtudents follow aprroach towards his talk. Overall the event was successful and refreshing for students.

Faculty Development Program: Machine Learning for Data science

Dear Sir,

We are pleased to invite you to the "Faculty Development Program: Data science and Machine Learning," scheduled from 6-7 Feb 2018 at PDEA's College of Engineering, Manjari. This FDP will be a joint effort of the Savitribai Phule Pune University and the Information Technology Department of PDEA's College of Engineering, Manjari (Bk), Pune.

The FDP is organized on the following themes:

Understanding the basics of Data Science and Machine Learning Case studies

Use of different Data Visualization Tools

It is an honor and privilege to invite you as "Guest of honor" for the inauguration ceremony of the FDP. We believe that your contribution to the field of Engineering education is unparalleled and your gracious presence for this program will inspire and motivate the participants.

Inauguration ceremony details:

Day/Date/Time: Tuesday, 6th Feb 2018, 10.00am

Venue: I.T. Seminar Hall

PDEA's College of Engineering Manjari Pune

We look forward to a positive confirmation, an honor for us indeed.

Permission letter

Respected Madam.

esmitted for Lecture organization.

We want your permission for organizing a Guest Lecture on "Cloud Computing" on 29th of july 2017 under ITSA. As we know that Cloud Computing is a current industrial topic which is trending in different companies.

So information regarding to this topic is very beneficial for our students specialy for BE students as they have Cloud Computing subject in their syllabus.

Your Sincerely.

MEMORANDUM OF UNDERSTANDING (MOU)

This Agreement is executed at Mumbai on 16th of June, 2017 between

Funfirst Global Skillers Private Limited, (hereafter referred as FGSPL)a Company incorporated under the Companies, Act 1956 and having the Corporate office atA-303-304, Kailas Industrial Complex, Park Site, Vikhroli West, Mumbai-400079hereinafter referred to as the "Company" of the first part (which expression shall, unless repugnant to the context or meaning thereof, deemed to mean and include its successors and assigns).

AND

P.D.E.A.'S College of Engineering Manjari (BK.), Pune Near V.S.L. Manjari (BK.) Pune – 412 307, India, (which term shall mean and include its successors and assigns) of the Second Part.

Whereas, FGSPL is a training partner of Electronic Skill Sector Council of India under National Skill Development Corporation, Govt. of India, currently providing trainings of Set-top Box Installation and Service, Television Repair Technician with focus on Flat Panel Display (FPD) TV and Home Appliance Installation & Repairing training The bouquet of training courses being offered will increase from time to time. The company is currently working on a project with Whirlpool of India Ltd.

Whereas, The P.D.E.A.'S College of Engineering Manjari (BK.), Pune is helping economics back ward class youth for providing trainings and placement in various organisation.

A. OBJECTIVE OF THE PROGRAM

M/s. Funfirst Global Skillers Private Limited has submitted to the P.D.E.A.'S College of Engineering Manjari (BK.), Pune a project proposal for support on Mobilization and Infrastructure required for youth for various projects as mentioned above.

B. PERIOD OF MOU

This MOU is valid for Twelve months from the date of signing.

The MOUcan be further extended as decided mutually by Company and "P.D.E.A.'S College of Engineering Manjari (BK.), Pune", on mutually agreed terms and conditions in such a case a new agreement shall be entered into specifying the extended period and other clauses.

C. SCOPE OF THE PROGRAM:

The proposed intervention will focus on the following deliverables from FGSPL:

1. Psychometric test of Candidates for selection

Propripal

Pune Devict I and Association's College I Manjari (Bk.),

Scanned by CamScanner

Providing pre-employment guidance

3. Provision of Content (in the form of Books) and technical training equipment

4.Providing expert trainers

 Third-party assessment & implementation support to P.D.E.A.'S College of Engineering Manjari (BK.), Pune

6. Certification at the end of training to the successful candidates

7. Ensuring placements with suitable employers on successful completion of training

D. ROLE OF COLLEGE

AND whereas, P.D.E.A.'S College of Engineering Manjari (BK.), Pune having considered the proposal has agreed to,

- Facilitate FGSPL with Identification of suitable candidates.
- ii) Collecting documents and data from candidates.
- Cunducting psychometric test of student at the start.
- (v) Continuous monitoring over candidates.
- Publicity in the socity and various educational campous near by.
- Provide infrastructure & support as desired by FGSPL.

E. MOBILIZATION TIME LINE

FGSPL and P.D.E.A.'S College of Engineering Manjari (BK.), Pune will mutually decide on a date to start training at a particular location. The batch size needed by FGSPL is 30 students who have cleared the psychometric assessment.

F. COMMERCIAL AND GENERAL TERMS:

FGSPL will pay Rs.500/-per student which includes,

- Administrative charges will be Rs: 225/- per student. (Hierarchy of administrative charges will be Center Head, Program Head, Program Coordinator).
- 2) Infrastructure utilization charges will be Rs: 275/-per student, as compensation for mobilization of students and for infrastructure according to MOU after the successful completion of assessment and Certification of eligible students and further terms as explained in Schedule "1"

G. TERMINATION:

Either party can terminate this agreement by giving a one month notice; however, FGSPL will ensure that all planned trainings are completed before termination.

H. AMENDMENTS

This Agreement shall not be changed, amended, terminated or superseded orally, but only by an agreement in writing, or any of the provision hereof be waived orally, but only by an instrument in writing, in any such case signed by the party against whom enforcement of any changes amendment, termination, waiver, Principal modification, extension or discharge is sought.

Pune District Education Association's College of Engineering Manjari (Bk.), Pune - 412307.

I. FORCE MAJEURE

Neither party to this agreement will be liable for breach of this agreement to the extent caused by or arising from prohibition or restriction by law or regulation of any Government, fire, flood, storms, weather, strike, lock-out or other labour problems, accident, riots, acts of God or other events beyond that party in breach.

For purposes of this Clause, "Force Majeure" means an event beyond the control of the Company and not involving the Company and not involving the Company's fault or negligence and not foreseeable. Such events may include, but are not restricted to, acts of the P.D.E.A.'S College of Engineering Manjari (BK.), Pune either in its sovereign or contractual capacity, wars or revolutions. fires, floods, epidemics, quarantine restrictions and freight embargoes.

If a Force Majeure situation arises, the Company shall promptly notify the P.D.E.A.'S College of Engineering Manjari (BK.), Pune in writing of such conditions and the cause thereof. Unless otherwise directed by the P.D.E.A.'S College of Engineering Manjari (BK.), Pune in writing, the Company shall continue to perform its obligations under the agreement as far as reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the Force Majeure event. Even the P.D.E.A.'S College of Engineering Manjari (BK.), Pune may terminate this agreement, by giving a written notice of minimum 30 days to the Company, if as a result of Force Majeure, the Company being unable to perform a material portion of the services for a period of more than 30 days.

J. NOTICE

All notices and other communications pursuant to this Agreement shall be in writing, in English and signed by the authorized representative of the sender and shall be given by personal delivery, by registered mail, by an overnight courier service which obtains a receipt to evidence delivery, or by facsimile transmission (provided that the receiving party sent a confirmation that he has indeed received the fax), to the Parties at the addresses set forth below or to such other address as the party to whom notice is to be given may have furnished to the other party hereto in writing in accordance herewith.

K. ARBITRATION

It is specifically agreed by both the parties that in case of any dispute arising out of his agreement; both the parties will try best to resolve the same within 30 days on one party notifying the other. Any disputes or controversy between the parties, which cannot be resolved amicably within 30 days of being communications inwriting, shall be settled by Mumbai Court. The decision of the Court and the award made in pursuance thereof shall be final and binding on the parties.

Sub: Request to deliver an expert lecture at the "Faculty Orientation Workshop on TE Revised Syllabus 2015 Course" under aegis of Board of Studies Electronics, Savitribai Phule Pune University

Dear Sir, Greetings!

We take immense pleasure in informing you that "Faculty Orientation Workshop TE Revised Syllabus 2015 Course" is being organized under the aegis of Board of Studies Electronics, Savitribui Phule Pune University for Mechatronics and ESD as per the details enclosed herewith, during 23rd and 24th June, 2017.

The objective of this workshop is to orient the entire faculty towards the revised syllabus of TE (E&TC/Elex) and to bring in uniformity in teaching across all the colleges under the University of Pune. Entire syllabus will be covered by expert teachers in concerned subjects.

We would indeed be obliged if you can kindly consent and deliver an expert lecture on Unit-III: Introduction to DBMS and SQL of Electronics System Design on 23rd June 2017 first session(9:30am to 12:00), at our institute.

Looking forward to your kind confirmation.

Thank You.

With Warm Regards.

To:

Prof. Mrs. Niraja Jain Prof. & HOD IT Engg PDEACOE, Pune

Dear Madam.

We sincerely wish to thank you for readily accepting our invitation and delivering an expert Lecture in "Faculty Orientation Workshop on TE(E&TC/Elex) Revised Syllabus 2015 Course" under the aegis of Board of Studies Electronics, Savitribai Phule Pune University organized by Department of Electronics and Telecommunication Engineering, RMD Sinhgad School of Engineering, Pune, on 23rd June, 2017.

Your expert lecture on "Introduction to DBMS and 5QL" from Electronics System Design was well received by participants and they were highly benefited with your experienced and knowledge based inputs. The valuable exposure about the teaching methodology, fundamental concepts presented by you will definitely help our participants to achieve their highest watermark in the domain.

We are indeed, deeply indebted to you for sparing your valuable time for this event and look forward to the same favourable support in future.

Thank You Once Again.

Warm Regards

Prof. Dr. D. S. Bormane, Coordinator, BoS (Electronics),

Abstract:

'Utility computing' was the concept introduced by John McCarthy in 1961 in a speech given at Mrf. He proposed that sharing the computing power on a sme-sharing basis will help grow business of 'providing computing power as an utility' and this was the inception of the cloud computing. Cloud computing can deliver the best to the end users either through the private, public or hybrid cloud infrastructures. As the databases are of significance importance, it is a mandate that they ought to be designed compatible to the rising cloud technology. Cloud computing has changed the face of the IT industry. But in the current scenario there are many database issues that are not addressed. With tremendous data growth, the need for the paradigm shift in the technology to be used to store, manage and retrieve data is awaited. Databases have changed from the storages to relational databases and further transformed to today's cloud databases. Still the need to process the query efficiently without losing the data privacy had been the topmost priority. The resource optimization and query dynamism are the major unchanged aspects in this changing scenario. The timing constraints on the query execution could be leisurely, indefinite, urgent or instantaneous, in almost all the scenarios, the effective storage, elastic manipulation and efficient data retrieval is the

I. Introduction

The multidimensional growth in computing systems and technologies have resulted in advanced, scalable, portable and large scale integrated systems and technologies. Data centers, writing addition, sloud and web 2.0 jechnologies are the tronsers of such growth. Scalability and thorough the admigniportant dimensions of these technologies [1]. In 1970, EF Could of 18th Research Lab introduced the rules for query optimization and relational databases [2]. This resulted in an efficient, optimized query processing.

Metadata

Abstract:

Databases are the core of all the business services that are offered online. Cloud. computing has drastically changed the way these online services are being offered. Hence it is of significance importance that the databases need to be compatible with cloud computing. The data is growing enormously with every passing day. With the paradigm shift in the technology used to store, manage and retrieve the data from file storage to relational databases to today's cloud databases, the need to process the query efficiently while preserving the privacy had always been the priority. The dynamism of the query and the optimization of the resources used for query execution. are the aspects that doesn't change in any situation. The timing constraint on the query execution could be either instantaneous, urgent, leisurly or indefinite. But in almost all the scenarios the effective storage, manipulation and data retrieval is the key. While retrieving the data stored in cloud, privacy preservation is of utmost importance. To improve query efficiency in cloud with preserving the privacy can be achieved by introducing dataflow optimization techniques and defining data descriptor based

I. Introduction

Cloud computing technology had changed the way the data is stored and processed. The multidimensional growth in computing systems and technologies have resulted into advanced scalable, portable and large scale integrated systems and technologies. Data centers, virtualization, cloud and WEB2 technologies are the leaders of this. Computing power was earlier based on the products used and usually upgrading was a costly affair. Advances in cloud computing technologies has changed the scene now and computing in being offered as a service over the internet. This has given the indisgniyational internet as well as ongoing cost. The private and poblic cloud platforms offer to deliver all the benefits of cloud computing technology to their customers. Databases had always been the critical part of this endeavour. E.F. Codd in 1970 proposed the rules for relational databases resulting into efficient and optimized query processing. To achieve such effectiveness todays cloud databases need to be made cloud computing compatible. Recent technologies are putting more demand on query optimization and data security with increasing scalability.

ABSTRACT:

Cloud computing technology had changed the way the data is stored and processed. The multidimensional growth in computing systems and technologies have resulted into advanced scalable, portable and large scale integrated systems and technologies. Data centres, virtualization, cloud and WEB2 technologies are frontiers of such grawth. Computing has changed itself from being a product to a service that can be delivered to the consumers over internet through large scale data centres or cloud, the data centres used to create cloud services represents a significant investment in capital outlay and on-going cost. The private and public cloud platforms offer to deliver all the benefits of cloud computing technology to their customers. Databases had always been the critical part of this endeavour. E.F. Codd in 1970 proposed the rules for relational databases resulting into efficient and optimized query processing. To achieve such effectiveness, todays cloud databases need to be made cloud computing computible. Recent technologies are putting more demand on query optimization and data security with increasing scalability.

The clouds provide on demand resources or services over the internet, usually at the scale and with the reliability of a data centre. The types of clouds can be categorized into architectural model, computing model, management model and payment model.

KEYWORDS:

Cloud computing, Database as a Service, Google Cloud

INTRODUCTION:

Over past few years there is an advent changes in the technology especially after the emergence and heavy use of Internet. Single System(Stand Alone) application are getting replaced by low cost, flexible and pay—asyou-go mechanism on distributed internet based applications. Here the public cloud system plays very important role. With the advent of Cloud platform where we are getting Software as a Service (SAAS), Infrastructure as a Service (IAAS) and platform as a service (PAAS) is getting popular day by day.

In this paper we are discussing about the SAAS where we are taking the Database as a service (DBaas) into consideration.

CLOUD COMPUTING DEFINITION:

The cloud computing industry represents a large ecosystem of many models, vendors, and market niches. The US National Institute of Standards and Technology (NIST) have published a cloud computing definition that attempts to encompass all the various cloud approaches. Cloud computing is the model for enabling convenient, on-demand network access to a shared pool of configurable computing resources that can be rapidly provisioned and released with minimal management effort or service provider interaction. This cloud model promotes availability and is composed of:

Essential characteristics: On-demand service provisioning, access to network, Resource provisioning, instant scalability and on demand guaranteed service

Service models: Cloud Software as a Service, Cloud Platform as a Service, and Cloud Infrastructure as a Service

Deployment models: Private cloud, Community cloud, Public cloud and Hybrid cloud

March 2018

KEY BENEFITS OF CLOUD COMPUTING:

- Virtualization; separating the business service from the infrastructure needed to run it.
- Flexibility to choose multiple vendors that provide
 - reliable and scalable business services
 - development environments
 - c. infrastructure that can be leveraged out of box
 - d. billed on a metered basis
- Flexibility of the infrastructure to instantly allocate and de-allocate massively scalable resources to business services on a demand basis.
- Cost allocation flexibility for customers wanting to move CapEx(Capital Expenditure) into OpEx(Operational Expenditure)
- Reduced costs due to operational efficiencies and more rapid deployment of new business services.

DATABASE AS A SERVICE:

When we are discussing about cloud databases, we mean and assume that it holds the information on distributed server in diverse areas as the information is kept on various cloud server around the globe. And because of this the cloud database structure will not remain same over the diverse database administration framework. On Cloud database platform there will be number of clients (hubs) which will able to handle multiple requests coming from multiple client. The connection of this system will be requiring convenient and full access to the databases on cloud environment. Many system over the cloud can get benefit the cloud database system, the user can connect to this by their own system or even through the handheld devices like mobile or tablet PC's. Following diagram will illustrate the flow of cloud database infrastructure.

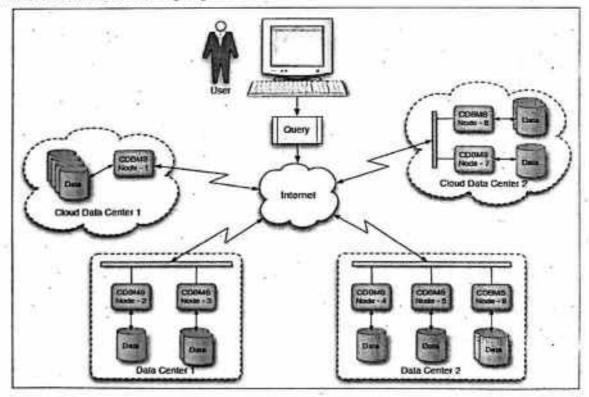

Fig. 1 Cloud Database Infrastructure

Volume 7, Jone 3 March 2018

Academic Science

CLOUD DRMS WISH LIST

- Efficiency: "Pay-as-you-go" model is atructmed such that the prior increases linearly with the requisit storage, network bandwidth and compute power.
- 2) Family inference: a fault tolerant transactional DBMS needs to recover from a failure without losing any data or updates from retently committed transactions; whereas a fault tolerant analytical DBMS wish it doesn't have to essuar a specy if one of the nodes involved in query processing fails. The long, complex queries are difficult to complete if it needs to restort each time of node failure. Business applications demand that the cloud durabase be ACID compiliant.
- 3) Arithy to run to heterogeneous environment, the degraded) inconsistent performance of cloud compute nodes would have dispipopuments effect on the query latesty. This need to be taken proper care of while designing a system for heterogeneous environment.
- 4. Ability in speciale the energied data, to prevent impulborated access to the sensitive data on cloud application should have ability to decrypt the encrypted that before accessing it. The data analysis ability to work with encrypted that datas directly will need shipping of small amount of data in turn significantly improving the performance.
 - 5) Ability to interface with business attelligence products: different customer-facing business
- 6) Intelligence tools working with drapture software to help in visualization, query generation, result dash-boarding and advanced data analysis typically merities with the database using JDBC or ODBC. So the database using JDBC or ODBC So the database software that works with these products miss accept SQL queries over these connections.
- Security white Create, Write To and Query database like Amazon Web Services Relational Database (AWSRD) using CEP (Cloud Event Processing). Cloud-based Event Processing is where some overif processing application is put into a closed / corporate, or public / distributed, cloud comparing environment. Event lineary and event some latincy are major considerations.

Databases in Cloud Computing Environment:

At present the cloud database environment is supposed to be the their pussible answer for most of the need of programming developers over the globe where they need to note the their data of their application in backend which can be accessed and adaptable to changes from even a single client. This Database as a service (Dilana) benefits over tot of traditional databases on local and server machine like MySQL, Oracle on. The daulance which are classified over the traditional RDS (Relational data services where we get the data on organizat way of SQL query writing. For such conventional databases on cloud are maintained by Amazon RDS, Google SQL and Microsoft Azons.

We have other side of gloud darshases like Amadon Simple DB, Google Data store which are not a RDS but based on NoSQL Databases concepts, which are unstandardized and doesn't require traditional RDBMS queries to work with such databases

These are some most popular databases in cloud comparing. They are mentioned below:

SmemDB MySQL

Google Cloud SQL | Mongolah

L PostgreSQL

As in this paper we are focussing on MySQL Google Databases on Cloud, we will be meolicning all the details about it.

MySQL

MySQL is an open-source local database administration framework. It is possessed by Oracle Corporation and can be utilized under either the GNU General Public License or a standard business permit asyotical from Oracle. MySQL is a bearty, multi-strung, value-based DBMS. It is preformably versuitle and can be conveyed.

Google Choul SQL, is the services which one can hire at Google chool which uses MySQL darriens essentily. It provides all the features of the MySQL and it is equally excital the way it was useful on recent

OVER DRIBLEGUS SERVERS.

Volume 7, Issue 3

March 2018

client server architecture. One can use MySQL Google Cloud services to support our database requirement of application from small to medium size applications.

MySQL databases sent in the cloud without an object. It is provided you by the Google Cloud Platform with effective databases that run quick, don't come up short on space and give your application the excess.

Following are some of the advantages of using MySQL Database in Cloud Computing.

Availability:

Most of the system which works on open source technology prefers the MySQL databases over the application development by the programmers. Hence it is available on large scale and programmers are comfortable using ît.

Buy the database administration only:

Some cloud organizations just offer MySQL database facilitating through a cloud-based facilitating record. As of late, organizations began offering databases as an administration, permitting people to pay just for the databases and not for a facilitating record that there is no utilization for.

Versatility: 3)

The versatility that originates from MySQL databases cannot be coordinated by individual or devoted devices. People would prefer not to ship in a bundle of database servers for trivial needs, however, cloud-based MySQL databases are ideal for such circumstance.

GOOGLE CLOUD MYSQL DATABASE ARCHITECTURE:

Following Figure 2 represents the overall architecture of how Google MySQL cloud services works. We had the database stored cluster wise/region wise on Google cloud. Whenever the request comes from users (clients) through internet it is passed to the Google Cloud platform. There is one compute engine that processes this request on cloud server where it will extract the SQL RDBMS query from the request and this query will get processed in Cloud SQL. This query upon the correctness of syntaxes will be executed on Cloud MySQL Database services and based on the query the result will be passed over internet to the user (Clients).

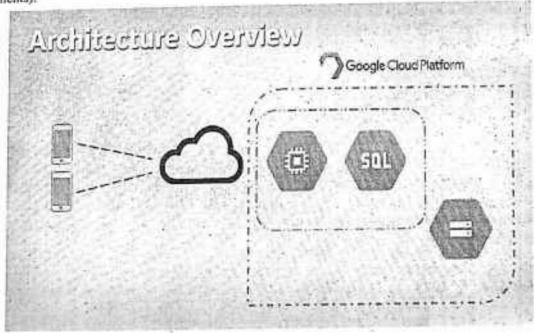

Fig. 2: Google MySQL Cloud Service

March 2018

CLOUD SECURITY:

Cloud Security Alliance identify seven threats to cloud computing that can be interpreted as a classification of security issues found within the cloud. They are:

- Abuse and Nefarious Use of Cloud Computing
- 2. Insecure Application Programming Interfaces
- 3. Malicious Insiders
- 4. Shared Technology Vulnerabilities
- 5. Data Loss/Leakage
- Account, Service and Traffic Hijacking
- 7. Unknown Risk Profile

Data loss / leakage stems from the disclosure of information that, though hidden, is deduced from freely available information. When users interact with a service they can leave a public trail, be it from status / update messages or through new postings. Unwelcome linkage occurs when new information is discerned about an individual through analysis of the individuals public trail i.e. links. This unwelcome linkage could be accidental or the result of the individual not covering their tracks. Social graph merging is similar to unwelcome linkage however the links formed occur through the aggregation of social graphs. A social graph is a graph describing a person's social information such as friends, groups and interests. Through combination of a person's social graph from separate social networking sites, or the social graphs of people from the same social network site, new information can be deduced.

The rise of cloud computing as an universal platform for providing all kinds of services to users and organizations demands research and development in all levels of computing systems. Starting from the hardware level, we may highlight the continuous need for mechanisms that improve the support to virtualization, which also affects significantly the operating system architecture and the interfaces to hardware and functions provided to user level. One particular challenge is data management, since data have been generated at unseen rates, which not only overloads storage resources, but also demand scalable algorithms. In this scenario, desired applications must process distributed data, which should be moved the least, and, if migrating data is necessary, it should overlap with actual computation as much as possible, it is necessary to foster interdisciplinary research to enhance cloud-based platforms and services because isolated efforts in any context will be less effective for not considering their impact on other research areas. Such a need seems to be even more important considering that cloud platforms and their usage are a moving target which demands fast, versatile and integrated models, algorithms, mechanisms and techniques.

REVIEW OF RESEARCH AND DEVELOPMENT IN THE SUBJECT:

(a) International status:

Millions of people are unaware of and uninformed about how their personal information is being used, collected or shared in our digital society. Data Privacy Day aims to inspire dialogue and empower individuals and companies to take action. Data Privacy Day began in the United States and Canada in January 2008 as an extension of the Data Protection Day celebration in Europe. Data Protection Day commemorates the Jan. 28. 1981, signing of Convention 108, the first legally binding international treaty dealing with privacy and data protection. Data Privacy Day is observed annually on Jan. 28.

A popular class of computing clouds is Database Infrastructure as a Service (IaaS) clouds, exemplified by Amazon's Elastic Computing Cloud (EC2). In these clouds, users are given access to virtual machines (VM) on which they can install and run arbitrary software, including database systems. Users can also deploy database appliances on these clouds, which are virtual machines with pre-installed pre-configured database systems. Deploying database appliances on IaaS clouds and performance tuning and optimization in this

environment introduce some interesting research challenges that include data security; database resource deployment on VM cloud optimization verses query optimization, applicability of Codd's query optimization.

Cloud services make easier for users to access their personal information from databases and make it available to services distributed across Internet getting exposed to challenges of privacy and security. Users have typically to establish their identity each time they use a new cloud service, usually by filling out an online form and providing sensitive personal information (e.g., name, home address, credit card number, phone number, etc.). This leaves a trail of personal information that, if not properly protected, may be misused,

(b) National status:

Protection of personal data is becoming a priority for the Indian Corporate sector, driven by stricter regulations on data privacy and increasing global business operations. Due to outsourced work, the Indian IT industry in particular has the additional responsibility to protect data of end-consumers from various countries, with exposure to much wider data protection regime. It is therefore imperative that the industry not only assign required focus to data privacy but may also use it as differentiator. While this importance cannot be undermined, privacy is not an absolute right and most data privacy regulations allow organizations to a reasonable extent, to balance it along with other conflicting interests such as security, need to comply with other laws or contracts, and business operations to some degree.

PRIVACY ISSUES IN CLOUD:

It is believed that information security policies cover the data privacy as well. Of course the two terms are interrelated. But in context of cloud computing, data privacy has its own concerns. The concept of privacy varies among countries, cultures, and jurisdiction as well as on the infrastructure of the organization. Privacy rights are related to the collection, use, disclosure, storage and destruction of personal data [9]. Privacy preservation should be managed as part of the data used by the organization.

IMPACT OF CLOUD ON DATA PRIVACY:

- 1. Generation of information
- 2. Use
- 3. Transfer
- 4. Transformation
- 5. Storage
- 6. Archival
- 7. Destruction

Fig. 3: Impact of Cloud of Data Privacy

March 2018

KEY PRIVACY CONCERNS IN CLOUD:

- 1. Organization's ability to provide the individual with access to all personal information and to comply with stated requests.
- 2. How the existing privacy compliance requirements are impacted by the move to the cloud?
- 3. Data transfer in cloud usually happens without the knowledge of organization resulting in potential violation of local law.
- 4. How long the personal information will be retained and who enforces this policy in cloud?
- Does the destruction of data policy destroys data or just makes it inaccessible to the organization?

CHALLENGES IN EXISTING SYSTEM:

The existing Walrus storage provides the list of private data to the users. The request to access public or protected data can be satisfied on demand of the client. But client need to specify the bucket name or the access URL for the bucket in advance. Usually the time required to locate the private bucket is less than the time required to access public or protected bucket because access control list of the bucket needs to be searched to check whether or not the user can access it. And revoking the access policy to reduce the search time for the buckets may compromise the privacy of the buckets.

In a cloud scenario neither the data owner nor the cloud server can enforce the owner's access control policy. The reasons being maintaining the confidentiality and performance. The data owner instead needs to mediate every access request to filter the query result. This in turn nullifies the advantage of storing data at an external server. Therefore it is necessary to design a mechanism such that the data themselves enforce the restrictions on the set of users who can access it.

Both the privacy of the users accessing cloud services and of the data stored at cloud servers may be at risk since access requests could be exploited either by the cloud server or by a malicious observer to possibly infer the sensitive content of the accessed data. The query evaluation process is also at risk since the cloud server is not trusted and therefore can compromise the integrity of query results. Query results satisfy the integrity checks if they are correct (i.e. computed on genuine data), complete (i.e. computed over the whole data collection), and fresh (i.e. computed on the most recent version of the data). Correctness can be achieved by digital signatures. Defining authenticated data structures on the data may ensure completeness. However thesedata structures may be less flexible as they provide integrity guarantee only for queries operating on the attribute on which the structure has been defined. Freshness can be provided by making authenticated data structures dependent on a variable that changes over time.

SIGNIFICANCE OF THE STUDY IN THE CONTEXT OF CURRENT STATUS:

Data privacy is "the aspect of information technology that deals with the ability an organization or individual has to determine what data in a computer system can be shared with third parties." This allows an organization to protect data within and outside organization boundaries, reducing the amount of weak points backers look for. Proper data security also protects data when it's shared with other users outside an organization's security system.

Privacy as a need in the society existed since centuries and laws on data privacy mostly started getting enacted in several countries from late 1900s. But it is only with developments in the field of ICT and increasing digital convergence in the last few decades that introduced much greater opportunities for easy exploitation of personal data by corporates and government, for commercial or other unintended purposes without consent or knowledge of data owner.

OBJECTIVES:

The privacy issues differ according to different cloud scenarios and can be divided into following categories:

(i) how to enable users to have control over their data when the data are stored and processed in cloud and avoid theft, nefarious use, and unauthorized resale,

Niraja Jain, Dr. B. Raghu, Dr V. Kanna

March 2018

- (ii) how to guarantee data replications in a jurisdiction and consistent state, where replicating user data to multiple suitable locations is an usual choice, and avoid data loss, leakage, and unauthorized modification or fabrication.
- (iii which party is responsible for ensuring legal requirements for personal information,
- (iv) to what extent cloud subcontractors are involved in processing which can be properly identified, checked, and ascertained.

CONCLUSION

This paper surveys the different cloud computing paradigms and the database support in the cloud environment, we propose to use the Eucalyptus private cloud architecture as the experimental setup for testing the effectiveness of privacy preservation strategy in storage clouds. Storage clouds allow the client to upload the data to the servers. The data is available as and when required with the implemented security policies and reliability. The most difficult task for the storage clouds is to identify the authorized user for the requested data from the huge collection. Cloud providers allow for direct access to the private data. It is expected that only the authorized clients from the list provided to get access to the private data be allowed and others be denied the service by the data provider.

Technology has a remarkable influence on the society in general and on human life in particular. Society has a cyclical and mutual dependence on technology. Technology has created many avenues and opportunities that were hitherto unimaginable. Since it has become a part of people's living rooms, the needs and demands for a safe technology has been on the rise. Improper use of technology has raised many flags of concern over the environment and overall well-being of the society. Technology is needed for activities such as communication, travel, trade and commerce, education, medicine, etc. Technology has begun to play a vital role in simplifying the way things are done. Thus, it is high time to create technologies that are safe and relevant to the societal needs. We have come of age and time to tackle some of society's most compelling issues pronto. It is no longer adequate to work in cells, taking on small sections of the problem at a time. Rather, it is imperative to pool knowledge and resources around the world to create opportunity, empowered by technology, for the society to improve life.

This book is a compendium of selected best papers presented at Techno-Societal: 2016 organized by SVERI's College of Engineering, Pandharpur,

India on 20-21 December 2016.

Techno-Societal: 2016 is a first international conference aimed at creating a growing sense of responsibility to solve the challenges of society especially through technology. More than 400 authors submitted their work to the conference. The conference editorial committee decided the acceptance of the submitted papers, with contribution of experts from various fields through double peer review process. A total of 193 full papers of original work were selected. During the conference about 20 keynote speaker sessions were arranged in order to give direction and contribute to specific research areas.

The conference offered various sessions under its name. For the purpose of this book, 108 selected papers and 6 papers from keynote speakers are divided into seven topical areas, viz. 1. Deployable Societal Technologies 2. Sensor-, Imageand Data-driven Societal Technologies 3. Mechatronics, Micro-Nano Related for 3.8,5Bio and Societal Applications 4. Lan-Level Advanced Societal Technologies 5. Manufacturing and Fabrication Processes for Societal Applications 6. Infrastructure Developments for Societal Applications 7. ICT-based Societal Technologies.

Keywords Transesterification - Catalyst - Heterogeneous - Optimization - Renewable

1 Introduction

1.1 Importance

Diesel fuels are used in many areas and have importance for the economy of countries. Interest in the use of alternative fuels for diesel engines has risen with the decrease of petroleum reserves and the rise in environmental consciousness. Because of the energy and global warming crisis, development of renewable energies, for example, H₂ energy, solar energy and biodiesel have been focused worldwide.

Due to the properties like high degradability, no toxicity, low emission of carbon monoxide, particulate matter and unburned hydrocarbons biodiesel has gained international attention as a source of alternative fuel. Biodiesel can be used in conventional compression ignition engines, which need almost no modification. It can be used as heating oil and as fuel.

1.2 Biodiesel

The fuel which will be alternated to diesel fuel must be suitable and acceptable technically, Biodiesel which can be produced from vegetable oils and animal fats is

3. 3 Demarive fuel for diesel engines. It is long-chain fatty acid alkyl ester and is one of the interesting alternative fuels which can be produced from renewable sources and provides complete combustion with less gaseous pollutant emission. Biodiesel is an ecofriendly and alternative energy source for diesel engines that can be synthesized by transesterification of vegetable oil or animal fat with alcohols.

Heterogeneouscatalyst

To avoid catalyst removal operations and soap formation and most important to save lots of waste stream, much effort has been expended on the search for solid acid or basic catalysts that could be used in a heterogeneous catalyzed process. In the heterogeneous process, the catalyst is very stable with no metal leaching. There is no formation of either glycerate salts or metal soaps which affords the advantages: no neutralization step is required, there is no introduction of water and there is no salt formation; these accounts for exceptional glycerol purity.

Transesterification Process

To avoid catalyst removal operations and soap formation and most important to save lots of waste stream, much effort has been expended on the search for solid acid or basic catalysts that could be used in a heterogeneous catalyzed process. Here a new continuous process is described, where the transesterification reaction is promoted by a completely heterogeneous catalyst.

Steps for Transesterification Process

- (1) Take one liter of Vegetable oil in round bottom flask and heat unto 65-70 °C
- (2) Check the FFA content of the oil. If it is more than 5% then esterification is essential.
- (3) Dissolve catalyst in alcohol, and then it is poured into the round bottom flask containing heated Vegetable oil.
- (4) Stirring of the mixture continuously.
- (5) Maintain the temperature for 1 h and then allow the reaction products to settle under gravity for 6 h in a separating funnel.
- (6) The color of Vegetable oil changed from deep brown to reddish yellow.
- (7) Vegetable oil methyl ester (biodiesel) and glycerol from upper and lower layers respectively.
- (8) Separate out biodiesel, catalysts, methanol and glycerol.

Optimization of Biodiesel Symbolis from Euranja Oil ...

2 Experimental Setup for Biodiesel Production by Transesterification Process

This experimental set up contains 1000 ml four necked round bottom flask as a reactor. The flask has placed in heating mantle whose temperature could be controlled. One of the two side necks has equipped with a condenser and the other has used as a thermo well. A thermometer has placed in the thermo well containing little glycerol for temperature measurement inside the reactor (Figs. 1 and 2).

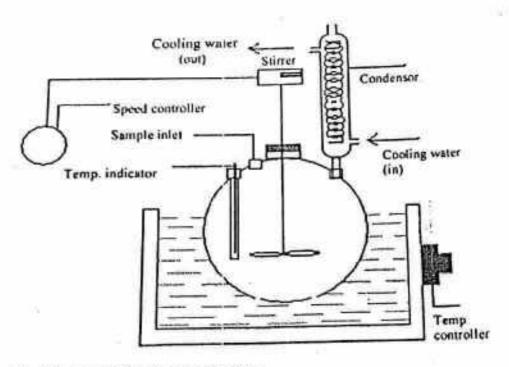

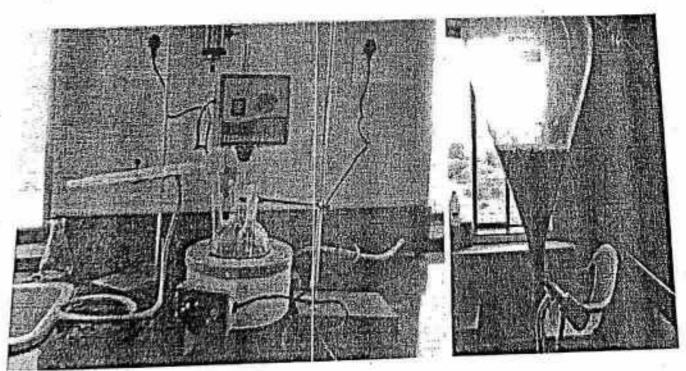

Fig. 1 Sketch of transesterification process setup

Condenser has used to reflux alcohol vapors back to the reactor to prevent any reactant loss? A blade stirrer has passed through the central neck, which has connected to a motor along with speed regulator for adjusting and controlling the stirrer speed. The transesterification reactions were performed in various conditions to determine the optimum conditions of transesterification. Variable quantities of catalyst were dissolved in various amount of methanol as described in each test. The reaction was carried out by taking 100 ml of Earanja oil and 0.4 wt% of CaO catalyst with oil to methanol molar ratio 1:4.

After 2-3 h the transesterification reaction was completed and mixture was withdrawn from the reactor and poured in the funnel separator to separates biodiesel from glycerol. Separation of two phases which is performed by gravity requires at least 4 h.

3 Different Parameters Affecting the Transesterification Process

Effect of different parameters studied as follows.

- (1) Variation of Molar Ratio in reaction.
- (2) Effect of amount of catalyst.
- (3) Effect of temperature on reaction.
- (4) Effect of stirring speed on reaction.

All these parameters were studied separately for yield optimization.

4 Results by Variation of Different Parameters Obtained for Karanja Oil with CaO Catalyst Are as Follows

To avoid catalyst removal operations and soap formation and most important to save lots of waste stream, much effort has been expended on the search for solid acid or basic catalysts that could be used in a heterogeneous catalyzed process. Oxide of calcium (CaO) has been tried as solid base catalyst owing to their easy availability, low cost and non-corrosive nature.

4.1 Effect of Molar Ratio

Variation of Molar Ratio for different catalyst percentages is done by keeping other parameters Speed—600 rpm, Temp—60 °C constant. Table 1 shows different Variation of Molar Ratio for different catalyst percentages (Fig. 3).

Criter Quidication of Biodiesel Synthesis from Karanja Oil ...

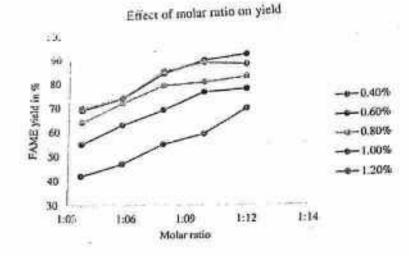

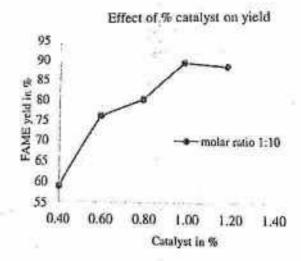

Fig. 4 Variation of catalyst is done by keeping the other parameters constant such as speed—600 rpm, temp—60 ° C and Molar ratio 1:10

4.2 Effect of Catalyst %

Variation of catalyst is done by keeping the other parameters constant such as Speed-600 rpm, Temp-60 °C and Molar Ratio 1:10 (Fig. 4).

Criteria 3

The effect of patalyst on yield was studied with catalyst concentration varying from 0.4 to 1.2% considering the weight oil in gram. Heterogeneous catalyst CaO was used and reactions were carried out at 60 °C. At the catalyst amount 1.0 wt%, yield was maximum. Further addition of catalyst has decrease the yield of methyl ester (Table 2).

4.3 Effect of Reaction Temperature

Temperature variation has done from 45 to 70 °C at all other parameters kept constant i.e. Speed—600 rpm, Catalyst 1.0% and Molar Ratio 1:10. The obtained yield is as shown in Table 3.

The graph shows that temperature has an important influence on speed of reaction and led to higher conversion of ester. With increasing temperature of reaction, yield of biodiesel increased quickly to near the boiling point of alcohol. At higher temperature than boiling point of methanol, alcohol evaporates and the yield was decreased.

Figure 5 variation of temperature is done from 45 to 70 °C at all other parameters kept constant i.e. Speed—600 rpm, Catalyst 1.0% and Molar ratio 1:10.

4.4 Effect of Reaction Time

Variation of Time from 25 to 75 min done by keeping other parameters Speed—600 rpm, Catalyst 1.00%, Molar Ratio 1:10 and Temp 65 °C constant (Table 4).

Table 2 Variation of Molar Ratio for different catalyst percentages

Catalyst %	Yield %	
0.40	59	
0.60	76	
0.80	80	
1.00	89	
1.20	88	

Table 3 Temperature variation has done from 45 to 70 °C at all other parameters kept constant

Temp. (°C)	Yield %

50	70
55	79
60	88
65	90
55 60 65 70	87

3.3,5

Fig. 5 Variation of temperature is done from 45 to 70 °C at all other parameters kept constant i.e. Speed—600 spm. Catalyst LO% and Molar ratio 1:10

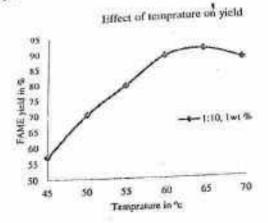

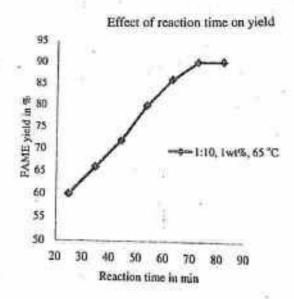

Table 4 Variation of time from 25 to 75 min done by keeping other parameters

Reaction time in min	Yield %
25	60
35	66
45	72
55	80
35 45 55 65 75	86
75	90
85	90

Fig. 6 Variation of Time from 25 to 75 min done by keeping other parameters Speed—600 rpm Catalyst 1.00%, Molar Ratio 1:10 and Temp. 65 °C constant

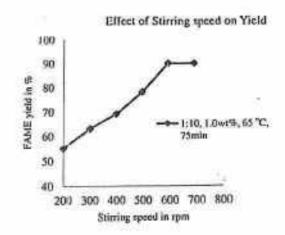

In 25 min of reaction time, 60% conversion of biodiesel was obtained, which increased gradually with an increase in time. A reaction time of 75 min was found to give maximum yield 86% of biodiesel. A further increase in time could not increase the yield of biodiesel. It was because of maximum triglyceride get converted into its particular ester (Fig. 6).

Table 5 Stirring speed
Criteria on stone from 200 to
700 rpm at all other
3.3 Farameters Catalyst 1.00%,

300	63
400	69
500	78
600	90
700	90

Fig. 7 Stirring speed variation is done from 200 to 700 rpm at all other parameters Catalyst 1,00%, Time 75 min, Molar ratio 1:10, Temp. 65 °C kept constant

4.5 Effect of Reaction Speed

Stirring speed variation is done from 200 to 700 rpm at all other parameters Catalyst 1.00%, Time 75 min, Molar Ratio 1:10, Temp 65 °C kept constant (Table 5).

The rate of stirring was varied from 200 to 700 rpm. The yield was maximum with 600 rpm of agitation. With the agitation lower than 600 rpm, a lesser yield was obtained. With an agitation rate higher than 600 rpm, no more increase in either yield was observed (Fig. 7).

5 Conclusion

The parameters that affected the Transesterification reaction are Molar Ratio of alcohol to oil, catalyst concentration, temperature of reaction, time of reaction, stirring speed. All these parameters were studied separately for yield optimization. The result shows that biodiesel production using CaO catalyst is a considerable potential in biodiesel production process. A large number of experiments were carried out on transesterification of Karanja oil with methanol to produce biodiesel under different reaction conditions and an attempt has been made to analyze the effect of various reaction conditions on biodiesel yield. Maximum yield for the

3.3 Boduction of methyl esters from Karanja oil was found to be 90% under the condition of temperature of 65 °C, the Molar Ratio of methanol to oil of 10:1, catalyst concentration of 1 wt%, stirring speed of 600 rpm and a reaction time of 75 min.

Maharashtra, India

Assistant Professor, Department of Computer Engineering, AISSMS College of Engineering, Pune, Maharashtra, India

ABSTRACT

In most of the areas for sharing information, slide presentation plays an important role. The slides for the presentation are traditionally prepared using various tools. The traditional way of presenting slides is labor-intensive. Labor-intensive nature leaves scope for human-errors. In this paper, Research observation is, enforcing the automated PPT creation from multi-documents of different extensions based on input query or title that formulate extraction of valuable information source and model a presentation view to automating slide creation using integer linear programming (ILP) method to generate well-structured slides by selecting and aligning key phrases and sentences. This will eventually help in reducing a great amount of the presenter's time and efforts. The proposed system works on natural language processing (NLP) rules to classify data for the desired slides. Preparing slides manually consume more time. The drawbacks of the traditional way lead to the need for an intelligent system. The intelligent system needs to be capable of generating slides with minimum human interference. The existing automatic tools fail to fetch the graphical elements from a given input. Hence the paper proposed an Automatic Slide Generation System. The proposed system fetches the graphical elements as well as text from a document. The proposed system is more reliable than the existing system.

Keywords: Classification, NLP. Support Vector Regression (SVR), ILP, Slide Generation, Modules

I. INTRODUCTION

As one of the most important ways of transferring information and knowledge, presentations provide users to discuss and exchange ideas together. Presentations now play an important role to promote understanding of presenters ideas in many fields such as education, research and business. Many university lecturers use Web service to store, browse, and share presentation slides that are used in their lectures. Although powerful tools for Inserted: slide composition have been developed and Web service has been widely used to share slides, they have a problem with preparing many lecture slides to help their students understand the contents. Lecturers to prepare slides that can need promote

understanding. But how to make the content of the slide fine-grained and highly structured is still a problem to address[4]. The traditional tools such as Microsoft PowerPoint and OpenOffice Impress fail to provide any functions of handling presenters' intentions. For example, the logical design of the slide structure and the interrelations between the objects. In presentation slides composition, it is necessary for presenters to consider topics, items, and their relations. Audiences cannot understand the presentation until they see the consistent discussion points in the slide structure. key idea is to construct a Language function from the objective function which is called as the primal objective function and . the corresponding constraints, by introducing a dual set of variables. Automatic slides generation for

ABSTRACT

Presentation slides are widely used to communicate information to the audience. There are various tools available in the market which only deals with the formatting of the slides but not the content. However, this traditional way of preparing slides is labor-intensive in nature and leaves scope for human errors. Also, for lengthy documents, there is a chance of some important information being missed out. The drawbacks of the traditional way lead to a need for an intelligent system. The intelligent system needs to be capable of generating slides with minimum human interference. In this paper, we are enforcing the automated PPT creation from multi-documents of different extensions based on input query or title that formulate extraction of valuable information source and model a presentation view to automating slide creation using integer linear programming (ILP) method to generate well-structured slides by selecting and aligning key phrases and sentences. This will eventually help in reducing a great amount of the presenter's time and efforts. The proposed system works on natural language processing (NLP) rules to classify data for the desired slides. Keywords: Classification, NLP, Support Vector Regression (SVR), ILP, Slide Generation, NLTK, Feature extraction.

I. INTRODUCTION

Microsoft PowerPoint, virtual presentation software developed by Robert Gaskins and Dennis Austin for software company the American computer Forethought, Inc. PowerPoint was designed to demonstrations for group facilitate visual business environment. presentations in the Presentations are arranged as a series of individually designed slides that contain images, text, or other objects. The presenter has numerous programming tools to assist him in setting up the slides, including Microsoft Power-Point, Open Office, and Libre Office. Such tools are helpful in setting up the theme and outline of the presentation; however, they do

not help presenters in selecting the content for the slides.

The traditional tools thus require a lot of investment, in terms of time and efforts. Collectively, a group of slides may be known as a slide deck [4]. The main focus of this project is to develop a system that helps to generate powerpoint presentation based on user query thus, preventing users time and increase performance. Support Vector Regression is used in maintaining all the main features which characterize the maximal margin of the algorithm. The Support Vector (SV) algorithm is a nonlinear generalization of the Generalized Portrait algorithm developed in Russia in.

3.3,5 Stolen Vehicle Detection and Automated Toll Collection System Using QR Code

Harshad Pampattiwar¹, Aishwarya Deshmukh², Pratik Sonawale³, Kajal Jagtap⁴, R.B. Rathod⁵

1.2.1.4 BE, Student, PDEA, Pune, Maharashtra, India

³Prof., PDEA, Pune, Maharashtra, India

Abstract- Road transportation is the backbone of any country's economy. Improvement in transportation will lead to lifestyle characterized by extraordinary moments of people, immense trade in manufactured of good. Developing countries like India needs a significant improvement in infrastructure such as Roads or Highways. Construction of these highways is a costly affair, which can't be invested by the government alone. Normally Public private partnerships are made to construct such a huge project. The money spent on these projects can be regained by collecting toll from the passengers who use the roads. The tall collection system, especially in India faces some problems such as long queue lines, escaping from toll plazas etc. These systems can service only 300 vehicles per hour, and if more than that number of vehicles arrives at that plaza, server traffic jams may occur. [1]

With the increase in the number of vehicles on road, there has been a marked increase in the number of crimes involving vehicle theft. In spite of several stringent laws being in place and security measures taken by car manufacturers, thieves still find a way to remain one step ahead and vehicle theft is still among one of the most reported crimes worldwide. Due to the expensive nature of motor vehicles, there is ample incentive for petty thieves to attempt thefts.[2]

Manual toll collection system contain many drawbacks, like it needs collector to collect the amount at a toll booth, delay in time, traffic congestion, more fuel consumption, longer queue of traffic. To solve these problems we propose QRCode base toll collection and stolen vehicle detection system. QRCode is generated at the time of registration of vehicle in our proposed system. On toll collection booth we collect toll as well as identify vehicle is stolen or not. Propose toll collection system is cost effective, it provides better experience to peoples, less delay of time, shorter queue of traffic, less fuel consumption.

Index Terms- QR-Code, Electronic toll collection, Toll Authorities, stolen vehicle detection.

I. INTRODUCTION

If you are driving an extended distance and try to induce there as quickly as potential, you may most likely move highways and interstates that permit you to travel quicker and have fewer, if any stops. Of course, sure varieties of roads have occasional stops wherever you have got to pay cash to travel on the road. These varieties of roads are referred to as toll roads. Generally they additionally blow over alternative names, like toll-way. To travel on a toll road, you have got to pay a fee - referred to as a toll. Generally you have got to prevent each therefore usually to pay extra tolls to stay traveling on the toll road. Most roads are engineered with native, state or national government cash raised from taxes. Tolls are sort of a tax that applies only to the users of the toll road. Toll roads permit new roads to be designed and maintained without raising taxes on the overall public. A toll road does not forever keep a toll road forever, though. Generally tolls are removed on roads once the price of construction has been recovered from the tolls collected, you may know you are on a toll road when you encounter a toll plaza. A toll plaza could be a gated space wherever you have got to slow down or stop to pay a toll to continue traveling on the road. There are typically many available lanes with toll booths to keep traffic moving as quickly as possible. Some lanes could have individuals working the toll booths, so you'll pay with modification or money. These lanes have gotten slower and slower day by day as a result of variety of vehicle get increase rapidly. To resolve this problem we are planning to use QR Code. [3]

QR is short for fast Response Codes. They're wont to take a bit of knowledge from a short-lived media and place it in to your telephone. You will before long see

Abstract -In India, the central calling is the cultivating. Almost the greater part of the cultivating is driven in the peaceful zones, however there is the insufficiency of the lodging and the carelessness about the different new innovations and the gadgets, because of which people groups are meandering towards developed territories. Thus, there is reprobate in horticulture. To overcome this issue, we go for splendid cultivating strategies using IOT. This ndeavor fuses different features like GPS based remote temperature identifying, clamminess distinguishing, appropriate usage of water in the residence. It makes usage of remote sensor frameworks for seeing the regular factors continually Various sensor center points are arranged at better places in the residence. Controlling these parameters with the assistance of any remote gadget or web administrations and the tasks are acknowledged by interfacing sensors, Wi-Fi, camera with microcontroller. The method, Image preparing is utilized for interloper's discovery perseverance. Gatecrasher recognition is finished by utilizing camera and additionally different calculations. After identification of interloper, the appropriate move is made by framework. General framework in the field can totally advance the yield of the harvests and general generation.

Key Words: 1oT; Sensors, GPS, Microcontroller, WI-FI, Camera, etc.

. INTRODUCTION

Farming is the help of Indian economy. The key issue looked in numerous country territories is that absence of automation in agrarian exercises. Horticulture is considered as most key wellsprings of wage and sustenance generation around the world. India is the country of cultivating. Most of the overall public of India live in towns and are totally subject to agribusiness. The center of the cultivation is water framework. In India cultivating practices is finished by troublesome work, using common instruments, for instance, wrinkle, sickle et cetera. Our Smart Farming System lessens the manual work and mechanizes the horticultural exercises. Actually, the sensor hubs are conveyed into the farmland. They begin to gather ecological data and screen soil qualities. At that point, they coordinate as indicated by planned conventions to impart the gathered information to an overwhelming hub. Starting now and into the foreseeable future, this information is arranged and treated to settle on a conceivable decision. The security perspective is instance of by what means can the WSN improve the agricultural yield. All things considered, crops are antagonistically impacted by human or animal interlopers. Furthermore, the age system is still deficiently controlled which provoke a potential thing disaster. To overcome this point, the video surveillance centers can be used to perceive and recognize intruders and to better manage the creation method. The objective of this errand is to modernize the standard water framework structure. The standard target of this wander is to save work, diminishes misusing of water, from time to time the harvests may waste in light of over water framework, in like manner using a SMS based strategy to checking the method which is important for the digitalize the robotized technique.

Cultivating is standard wellspring of the all-inclusive community in current circumstance. It gives sustenance

and what's more tremendous work. Thusly, modernization of agribusiness is basic in light of the way that customary developing can't bolster up the collect yield. Subsequently, agriculturist start to use the diverse advancement to achieve better yield and decrease the required work.

In our endeavor, we are basically concentrating on following applications.

For an instance:

To reliably screen the soil sogginess.

To reliably screen the water level.

To check the temperature, stickiness.

To screen and control the whole structure.

Give the detail information about the field condition to the customer.

A) An Internet of Things:

The Internet of Things (IoT) is one system which contains physical items that are implanted with the electronic gadgets, software's, network and sensors to accomplish a higher esteem and give a few administrations in regards to trade of subtle elements with the item producer, administrator. Typically, it is relied upon to give present day and pushed relationship between the contraptions for its proper correspondence and handles a combination of traditions, applications and learning bases.

Subject: Appointment as External Examiner for End Semester Practical Examinations November 2018

Dear Sir.

I am pleased to communicate that you have been appointed as Practical Examiner for the End Semester Practical Examinations of the University to be conducted in November 2018.

The details of the examination/s assigned to you are as given below:-

Sr.	Course Code	Course Name	Date/s of Practical	Batch and Session		
No.	Course Cour	Course (vame	Examinations	Batch	Timing	
į.	17MTMV322	Project Phase - I	20/11/2018	I	10:00 am to 1 pm	

You are requested to conduct the practical examinations on the scheduled date and time. Remuneration as per University Rules is payable to the Practical Examiner.

The venue of the Practical Examinations is MIT School of Engineering, MIT Art, Design and Technology University, Rajbaug, Loni Kalbhor, Pune.

For further details or any other clarification, you may please contact Prof. Reena Gunjan, Department of Electronics and Communication Engineering, MIT School of Engineering, MIT Art, Design and Technology University, Rajbaug, Loni Kalbhor, Pune on Contact No: +91 7741974709

In case, you are unable to take this assignment, kindly communicate at the earliest.

With Regards,

Prof. Dr. Ashish Panat

Guest Lecture Report

The Department of Computer Engineering of PDEA College of Engineering Manjari organized a guest lecture on "Career Guidance by Employee Factory" on 1st of March 2018 from 10:15 am to 12: 30 pm at IT Seminar Hall. The speaker of the session was Mr. Ashish Sharma who is founder of The Employee Factory firm and having a great experience on cooperate world. He explained us about the various job opportunities in IT industry. He explained to the students about what are the basic skills they required in CV for grabbing opportunities in IT Company. Also the resource person focuses on latest IT industry trends including block chain. He introduces what is block chain technologies and its importance. Also he highlights the job opportunities in block chain technologies.

During the talk Mr Ashish Sharma asks many questions to the students regarding awareness and making interest among them. Ashish Sharma was a very interactive person with his communication skills. The students got free and healthy atmosphere during the session. Some of the students are very keen to asking lots of questions on job opportunities. The spoke person gives all the answers to each student.

His main aim was to let us know what kind of job opportunities came across during students job searching and how to decide and tackle the same.

Around 50 students attended this lectures from both second year computer and IT department. He also took an initiative to arrange many more session from his side to the students on the same.

Topic Name: Career Guidance by Employee Factory

Speaker Name: Mr. Ashish Sharma (Founder, The Employee Factory)

Date: 01/03/2018

Venue: IT Seminar Hall

Organized By: Prof. Rathod R. B.

The event is oraganized for students in order to get knowledge of job opportunities in IT industries with different profile. The expert was having long experinece in IT domain and running the Empoyee factory firm for job seekers. The students got benefitted with his talk and also speaker got convience by situdents follow approach towards his talk. Overall the event was successful and refreshing for students.
