Hi Sir,

As discussed over phone call, I would like to help students in JAVA interview preparation. Seminar would definite help students to face interviews more prepared and confident. Please provide the permission to take the seminar within college Campus.

Duration : 7 days

Daily Hours : 2 hours

Preferred time slot : 9 AM-11 AM

Topics covered:

1. OOPS concepts
2. Access specifiers
3. Method overriding
4. Method overriding
5. FINAL, STATIC, VOLATILE, TRANSIENT keywords
6. Exception handling
7. Serialization
8. Immutable class
9. String
10. Wrapper classes
11. Collection framework
12. equals and hash code contract
13. Multi-threading basics

Request you to provide permission. Also I would like to know how many students would be interested for seminar series?

Regards,

Pradip Batule

## 'FITT' PRINCIPLE –

### FREQUENCY, INTENSITY, TIME, AND TYPE

Understanding the F.I.T.T. principle helps you create a workout plan that will be more effective in reaching your fitness goals.

**FREQUENCY:** The first thing to set up with your workout plan is frequency—how often you exercise. Your frequency often depends on a variety of factors including the type of workout you're doing, how hard you're working, your fitness level, and your exercise goals.

**For cardio:** moderate exercise five or more days a week or, Intense cardio three days a week to improve your health. If you want to lose weight, you'll want to work up to more frequent workouts, often up to **six or more days a week.**

**For strength training:** The recommended frequency is two to three non-consecutive days a week (at least one to two days between sessions). Your frequency, however, will often depend on the workouts you're doing, because you want to work your muscles at least two times a week. If you do a split routine, like upper body one day and lower body the next, your workouts will be more frequent than total body workouts.
